Linido flip-up shower seat totally renewed: contemporary and ergonomical!

LI2201.200 Shower Seat

LI2202.200 Shower Seat with Backrest

LI2203.200 Shower Seat With Backrest & Armrests

The human body was the focal point in developing the new Linido shower seat.

- The backrest follows the natural S-curve of the human spine giving natural support, while the ergonomically designed curved seat delivers a more comfortable seating surface for the user.
- The larger seating surface and 330lb. weight capacity gives the Linido shower seat strength and stability that will ensure safe and comfortable showering for the larger user.
- All models can be folded up against the wall to create an unobstructed safe space when not in use.
- Made of synthetic plastic, stainless steel and aluminum, corrosion will never occur, and the reinforced fiber glass plastic offers a durable seating surface that is ultra hygienic and easy to clean.
- Mounting holes are easily accessible around the seat making installation simple.

*LI2216.001
LI2216.002 Height Adjustable*

The click-on frame can be hung over various Ergogrip Grab Rails and can easily be folded up and removed, ensuring the bathroom is always available for everybody's use.

LI2214.201

The H-shaped floor support clips onto our new seats and is recommended when there is any doubt concerning the strength of the wall.
