

## The long awaited Kids Rock Size 3 is Now Available!

January 2010 – The Kids Rock Active chair, previously available in Size 1 and 2, is now available in Size 3. The Rock Chair, with its increased weight capacity and larger seating surface can now accommodate adolescents through small adults.

The Kids Rock Active Chair is the first truly dynamic chair of its kind.

The Active feature enables the child to stretch at the hips and knees while maintaining proper pelvic position and therapeutic support. The Reaction (ACTIVE) feature accommodates up to 35° of hip extension.

Clinical studies have demonstrated increased ranges of motion at the hips and knees, tone management and increased levels of daily function, greater peer interaction and increased sitting tolerances.

Building on over 45 years experience in the home health care industry, *R & M Health Care* is committed to bringing the latest innovations in bath safety, seating and positioning and pediatric mobility to the Canadian market. R & M has formed partnerships with three of the industry's leading manufacturers and is able to offer a full line of products to fit the diverse and individual needs of your clients.
